### Introductory note

#### This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This variation will change the existing waste management license, A11 - Household, commercial and industrial waste transfer station, to standard rule permit, SR2008No7 - Household, commercial and industrial waste transfer station with treatment and asbestos storage. This is required because the original WML was issued for both the inert landfill and waste transfer station. However, the landfill is currently regulated under IPPC permit granted in 2005. The existing WML contains all the original landfill conditions which are no longer relevant.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number. .
